

**NewFer GmbH**  
Excellence in Beneficiation  
& Agglomeration

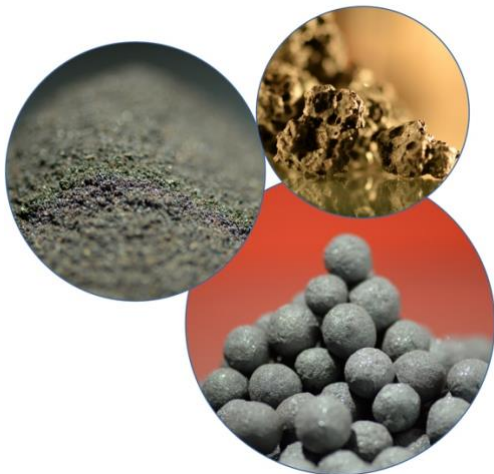

## **Three Associates**

- Profound technical background (Geology, Minerals Processing, Civil Engineering)
- 20 – 30 years relevant industrial experience in business and market development, project management, implementation of LSTK-projects, process engineering, raw materials characterization,
- Proficient in German, English and Portuguese

## **Key Experts Network**

- Unparalleled expertise in beneficiation and agglomeration of minerals, plant and mechanical engineering, material science, ferrous metallurgy, plant commissioning, electrical- /instrumentation- /automation-engineering
- 15 – 45 years relevant industrial experience
- Proficient in German, English, French, Portuguese, Farsi, Spanish, Telugu, Hindi, Turkish, Czech

# Excellence in Beneficiation & Agglomeration

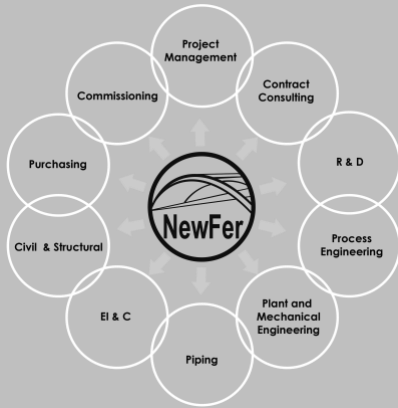

NewFer offers services for the

- Design,
- Manufacturing and Procurement,
- Installation and
- Commissioning

of iron ore beneficiation, agglomeration and pelletizing plants

# Scope of Services

NewFer's key activities center around reduction of investment and operating costs, especially energy, water and emissions, and the improvement of product quality.

NEWFER owns vast experience in raw material characterization, design, process engineering, plant – and mechanical engineering for iron ore pelletizing plants.

These core capabilities are supported by general engineering skills, such as electrical- instrumentation and control engineering, civil.
